Chad,

In reviewing the 3-4-2023 revised proposal submitted by Sharon Kloepper, I'm lacking information on the following and wondering why this was not requested of her prior to voting:

- 1) A location map showing the proposed planting areas.
  - 5th and Gearhart? Is this (2) different areas? Google maps not showing.
  - Pacific Way where??
- 2) A City map locating existing water lines and extensions for (3) new "spigots" .
- 3) The cost for City's participation?
  - Digging the holes, soil, manpower, installation of (3) water spigots
  - Pruning, maintenance, spraying required over the years assumed by whom?
- 4) How were the species selected? Are Cherry trees the best option?
  - Pines ruled out?
- 5) Was any thought of this brought up prior to someone wanting to give the City free trees?
- 6) Was Jeff Miller's tree planting proposal for this spring done in the same manner?

Thanks,

deb byerly papadopoulos
