Mayor Brown, Councilors, City Manager Sweet.

I would like to request please that the most recent draft of the Coastal Resiliency Plan be available to the public well in advance of the June 5 meeting, and that the June 5 meeting be formatted so I and perhaps others can present some findings and make preliminary recommendations. I would hope this meeting can be highly constructive and informative, with the primary focus on saving lives during a mega-event.

I have studied both the DOGAMI inundation map, DOGAMI evacuation maps, researched earthquake/tsunami preparation and response, as well as visited all Gearhart assembly areas, and would like to constructively ask some questions, make recommendations and discuss findings with you.

I am requesting that the Agenda allow for public comment and ample time for discussion.

Thank you,

Stuart Emmons
